1. A Notice of Appeal was filed on Appellant's 37 CFR 1.192(a), or any extension thereof (37 CFR	R 1.191(d)), to avoid dismissal of	riod set forth in the appeal.	
2. The proposed amendment(s) will not be entered be	cause:		
(a) they raise new issues that would require furthe	r consideration and/or search (s	ee NOTE below);	
(b) they raise the issue of new matter (see Note be	elow);		
(c) ☐ they are not deemed to place the application in issues for appeal; and/or	better form for appeal by mater	rially reducing or sim	plifying the
(d) they present additional claims without canceling NOTE:	ng a corresponding number of fi	nally rejected claims	
3. Applicant's reply has overcome the following rejecti	on(s):	•	
 Newly proposed or amended claim(s) would be canceling the non-allowable claim(s). 	pe allowable if submitted in a se	parate, timely filed a	mendment
5. ☐ The a) ☐ affidavit, b) ☐ exhibit, or c) ☐ request for application in condition for allowance because: See	reconsideration has been consideration Sheet.	dered but does NOT	place the
6. The affidavit or exhibit will NOT be considered becaraised by the Examiner in the final rejection.	use it is not directed SOLELY to	issues which were	newly
7. For purposes of Appeal, the proposed amendment(explanation of how the new or amended claims wo	s) a)⊡ will not be entered or b)l uld be rejected is provided belov	\boxtimes will be entered an v or appended.	ıd an
The status of the claim(s) is (or will be) as follows:			
Claim(s) allowed:			•
Claim(s) objected to:			
Claim(s) rejected: <u>1-8,10-13,15-20 and 22-31</u> .			
Claim(s) withdrawn from consideration: 32-50.			
8. The drawing correction filed on is a) appro	oved or b) disapproved by th	e Examiner.

Continuation of 5. does NOT place the application in condition for allowance because: Applicant's arguments are not commensurate in scope with the claims. Applicant argues that the Reed does not teach the claimed immobilized sensing elements (i.e. polypeptide or fragment, truncation, domain or concatenation thereof) and does not teach labels that undergo a change on ligand binding but instead teaches cell sensing elements. The arguments have been considered but are not found persuasive because, as Applicant acknowledges and a cited in the Office Action, Reed teaches immobilized cells and the immobilized cells comprise a biological sensing element. Because the cells comprising the sensing element are immobilized, the sensing element is also immobilized. Applicant appears to be asserting that the claims require the sensing element be immobilized via direct contact with the surface of the solid support (e.g. covalent attachment between a polypeptide and functional group on the solid support). However, the claims are not so limited. The claims merely require immobilization of the sensing element and as cited in the office action, Reed teaches this element of the invention. Applicant further argues that the label of Reed is used for immunocyto-chemical localization as opposed to detection. The argument has been considered but is not found persuasive because, as Applicant acknowledges, the sensing element of Reed is labeled. The courts have stated that the intended use and/or function of a product does not define the product over the prior art (Ex parte Masham, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987). Hence, the functionality of the label recited in the claims does not define the label over that of Reed.

BJ FORMAN, PH.D.
